- Node.js / Express / MongoDB.
- Unit and integration tests.
- Generating the production build and deployments.

| Scrimba.com |

- Reusability in React, Performance and React Context.
- React Router and Dependencies.
- Ecommerce Functionalities.
- Redux

FULLSTACK DEVELOPER COURSE

Abril 2021 -Enero 2022

| Go-Elevate |

- Full stack developer course by Eng. Gustavo Andres Brey
- Using the Mumuki platform, which includes Computational Thinking, Gobstone.
- Object Oriented Programming, JavaScript, Git, Database, Linux, Slack, Github and React JS.

SKILLS

React

Redux/ ReduxToolkit

JavaScript

Python

HTML 5

CSS3

Node

Express

MongoDB

Firebase

Sql

Strapi

MaterialUI

Bootstrap

Tailwind

Figma

Git/ Github

Npm / Vite

Vercel

INTERESTS

If there's something I'm passionate about besides Fullstack at this stage, it's always been music. Since I was 15 years old I have been playing different instruments (Drums, Piano, Guitar, Bass and Synthesizers) and in recent years I have specialized in sound engineering and music production.

I consider myself a very patient and persevering person, with a low profile but without problems in expressing what I think or what I feel or believe is fair. Fully adaptable to different social and work environments, moldable and easy to carry. Always looking for communication with my work team, looking for a balance between what they expect of me, what I want and what the company or workplace where I am needs. I am also very curious about what I am passionate about, and I am constantly dedicated to learning and improving in different aspects of my life. I am married to the person I love the most and I want to offer him the greatest financial and emotional stability.

I am totally a cat person.
